

Our Hydrogen Peroxide WFI Sterile Solutions are made with United States Pharmacopeia (USP) quality Water For Injection and Hydrogen Peroxide. It is designed to remove organic and inorganic residue from surfaces. Sterile filtered and filled in an ISO Class 5 aseptic environment, each package is double bagged for easy entry into your controlled environments. These products have an extensive documentation package to meet your validation objectives and are supported by the STERIS Technical Services team for individualized application and validation assistance.

Hydrogen Peroxide WFI Sterile Solutions

Low residue cleaner with minimal organic carbon

Features

High quality hydrogen peroxide

WFI produced from a Finn-Aqua® Multiple Effect Water Still

Contains minimal Organic Carbon

Double bagged

0.2 micron filtered, filled in ISO Class 5 (Grade A or Grade B at rest) environment and each lot is USP <71> sterility tested

Manufactured under a FDA cGMP, ISO 9001 and ISO 13485 compliant quality system

Benefits

Extremely low odor and residue

Highest quality Water For Injection for your facility

Reduced impact on Total Organic Carbon analysis samples and environmental air quality

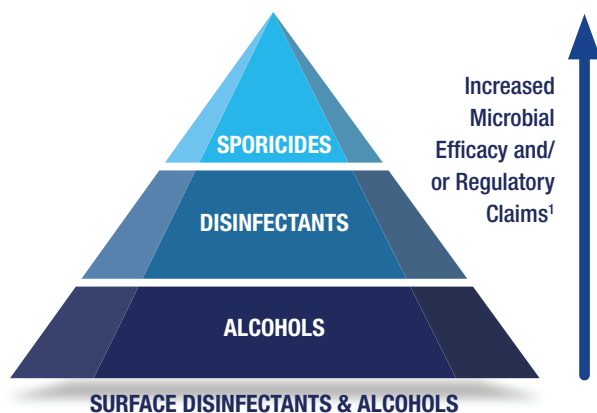

Allows easy entry into controlled environments

Facilitates introduction into your critical areas

Supports quality assurance and quality control

Applications

- Residue removal from:
 - » Product contact surfaces
 - » Floors
 - » Walls
 - » Ceilings
 - » Countertops
 - » BSL hoods
 - » Carts and other equipment
 - » Gloves
- Products may be applied by:
 - » Mopping
 - » Wiping
 - » Spraying

¹Products that fall into the categories at the bottom of the pyramid are most frequently used and are generally not sporicidal. Progression up the pyramid indicates stronger performance overall and a broader spectrum of claims.

An important aspect to any microbial control program is including rinsing or cleaning steps to control residues. Residues can lead to future contamination whether they are on the floor or product contact surfaces. When removing residues, it can be important to use products that do not simply leave behind a different residue. Our Hydrogen Peroxide Solutions are ideal for this important application since they have extremely low residues and decompose into water and oxygen. In addition the lack of any significant organic carbon in these formulations is useful in areas where Total Organic Carbon (TOC) measurements are made or when volatile organic carbon (VOC) emissions need to be limited. Our Technical Service team can help customize your contamination control program to take advantage of this excellent product.

Ordering Information (Outside of the US)

6% Hydrogen Peroxide WFI Sterile Solution

Description	Part Number
22 oz (650 mL) trigger sprays (12 per case)	1S0577WR
32 oz (946 mL) trigger sprays (12 per case)	1S0596WR
1 gallon (3.78L) bottle (4 per case)	1S0508WR

Ordering Information (Worldwide)
